Commercial and income generation opportunities explored and shared across CSW
Space is created for category managers to modernise
CSW procurement processes and contracts permit and encourage innovation
Use more outcome based specifications
Council's procurement staff are more commercially minded and understand and realise benefits from all funding streams including how contracts can be developed to generate income
Suppliers are able to demonstrate innovation through all stages of the procurement cycle
Commercialisation and income generation
Supplier innovation
NPS theme
NPS outcomes
NPS priorities
CSW response
Modernisation
Using technology
EU Directives
Councils increase efficiency and productivity and realise full benefits through the use of appropriate e-procurement solutions in procurement processes
Use of e-invoicing helps councils and suppliers, streamlines administrative processes and improves supplier liquidity
Council procurement processes are quicker, simpler and less costly to run through use of the new EU directives
CSWJETS shared etendering system continues to be developed to meet the sub region's electronic procurement requirements
Share knowledge on the implementation of e-invoicing on Agresso and Oracle, learning from each other's experiences
Take every opportunity to implement PCRs 2015 effectively to reduce the cost of procurement processes. Complex services may need longer for bidders to develop appropriate bids, however, better engagement at pre tender stage will reduce timescales
