Date section 1a completed	14/07/2015

1. Provide brief details of the aims of the project / review

This ECA is being carried out as part of the project to make changes to the Council Tax Support scheme for 2016/17. These changes are necessary as the Council considers ways to make additional savings in response to the decreased level of funding from central government over recent years. The amount needed to be saved is around £2.3 million and some potential scenarios for requiring a contribution from working-age residents towards their Council Tax are being looked at as the new scheme is being developed. The three scenarios are as follows:

Scenario 1 – excluding disabled residents from any reduction in council tax support and introducing a 20% reduction in support for the rest of the working age population in the city.

Scenario 2 – introducing a minimum 10% reduction in support with a taper of 40% on excess income.

Scenario 3 – introducing a universal 15% reduction in support for all working age people.

Under national rules governing support for pensioners (who make up approximately 40% of the caseload in the city) people of pension age will not receive any reduction in entitlement under the new scheme.

In developing ideas for a new scheme, the Council has been mindful of its existing responsibilities under the Child Poverty Act 2010, the Disabled Person Act 1986 and the Housing Act 1996 – as well as the public sector equality duty in the Equality Act 2010.

In addition to this, and in line with statutory guidance, the Council is required to undertake consultation firstly with major precepting authorities before consulting more widely on the revised scheme.

Attached as an appendix to this ECA form is a more comprehensive analysis of claimant data for each of the three scenarios outlined above. In summary, this shows:

Scenario 1 would result in more of an impact across the board for all non-disabled residents than the other scenarios, in particular for those in work, couples, those with children (especially larger households) and those benefit capped.

Scenario 2 would have less of an impact on those out of work and those already subject to the benefit cap and a greater impact on couples, working claimants and working claimants with children.

Scenario 3 would have a fairly even impact across all equality groups, with a slightly higher reduction for couples and larger families. For this reason this scenario is preferred.

All three scenarios impact more on single women than single men.

Once implemented, the effects of the final scheme will need to be carefully monitored in order to track the impact on key protected groups in the city.

Please note that in the commentary below, the figures in brackets relate to the additional weekly council tax charge that would be made.

Impact on service users

2. What are the possible impacts of this project / review on the following groups?

Assess the impact of this project / review on people with the following [protected characteristics](#); and agreed local priority groups. Please summarise local service level data as evidence of any impact and also consider other local and national data or evidence. Under 'Mitigating Actions' outline briefly what actions you plan to put in place to lessen any negative impact on protected groups. Delete any of the characteristics below which do not apply.

Protected characteristic

Commentary / Analysis

Impacts / Mitigating actions

Protected characteristic	Commentary / Analysis	Impacts / Mitigating actions
Age	<p>Scenario 1 There is no differential impact in relation to age as a result of this scenario; however, there will be more impact on working claimants who have children (£3.34) as compared with working claimants who do not have children (£2.30) and on larger families with 5 or more children (£3.57). This is due to bigger size of the property and the larger Council Tax award to these families. Young people are also more vulnerable because they have less disposable income and are more likely to have a shortfall in their rent. This scenario could also contribute towards increasing child poverty in the city.</p> <p>Scenario 2 This scenario is likely to have more impact on couples aged 25 and under – and this is the age group that generally has more children.</p> <p>Scenario 3 There will be more impact on larger families with 5 or more children (£3.08). This scenario could also contribute towards increasing child poverty in the city.</p>	<p>Positive impacts: Scenarios 1, 2 and 3 will benefit Pensioners</p> <p>Negative impacts: Scenarios 1, 2 and 3 will have a potentially negative impact on children and young people</p> <p>Mitigations: Set out the mitigation for negative impacts.</p>
Disability	<p>Scenario 1 Disabled people would be protected from charges under this scenario. But non-disabled claimants will be disproportionately impacted more (£3.09).</p> <p>Scenario 2 This scenario protects disabled people marginally more (£2.05) than scenario 3 (£2.69).</p> <p>Scenario 3 There is no differential impact on disabled people under this scenario.</p>	<p>Positive impacts: Scenario 1 is better for all disabled people</p> <p>Negative impacts: State your reasons / evidence for negative impact.</p> <p>Mitigations: Set out the mitigation for negative impacts.</p>

Protected characteristic	Commentary / Analysis	Impacts / Mitigating actions
Gender	<p>Scenario 1 Single women will be impacted more (£2.59) than single men (£2.00) under this option.</p> <p>Scenario 2 Single women will be impacted a lot more (£2.41) than single men (£1.89) under this option.</p> <p>Scenario 3 Single women will be impacted slightly more (£2.49) than single men (£2.33) under this scenario</p>	<p>Positive impacts: State your reasons for positive impact, if any.</p> <p>Negative impacts: Single women are impacted more than single men under each of three scenarios.</p> <p>Mitigations: Set out the mitigation for negative impacts.</p>
Gender Reassignment	No data is available here to inform equality analysis	
Marriage/Civil Partnership	<p>Scenario 1 There will be a greater impact on couples under this scenario (£3.21) as compared to single people (£2.40).</p> <p>Scenario 2 There will be a greater impact on couples under this scenario (£3.57) as compared to single people (£2.24)</p> <p>Scenario 3 This scenario will impact more on couples (£3.20) than on single people (£2.44) (on the basis that single people have less council tax liability, due to a 25% single person discount).</p>	<p>Positive impacts: State your reasons for positive impact, if any.</p> <p>Negative impacts: Couples are impacted negatively under all three scenarios as compared to single people.</p> <p>Mitigations: Set out the mitigation for negative impacts.</p>
Pregnancy/Maternity	No data is available here to inform equality analysis by this protected group	

Protected characteristic	Commentary / Analysis	Impacts / Mitigating actions
Race	<p>NB – data by ethnic group is not collected so firm conclusions in relation to equality impact cannot be drawn.</p> <p>Scenario 1 There will be more impact on larger families (£3.57) and evidence suggests that many of these larger families are from certain ethnic groups.</p> <p>Scenario 2 There will be no disproportionate impact on larger families, therefore certain ethnic groups, as a result of this scenario.</p> <p>Scenario 3 There will be more impact on larger families (£3.08) and evidence suggests that many of these larger families are from certain ethnic groups.</p> <p>In addition, although there is equal household impact across all wards, the cumulative impact is highest across Foleshill, St. Michael's, Longford, Binley and Radford. This correlates with a higher concentration of some ethnic groups in these wards.</p>	<p>Positive impacts: State your reasons for positive impact, if any.</p> <p>Negative impacts: as data by ethnic groups is not collected as a primary source, no firm conclusions about negative equality impact have been drawn.</p> <p>Mitigations: Set out the mitigation for negative impacts.</p>
Religion/Belief	No data is available here to inform equality analysis by this protected group	
Sexual Orientation	No data is available here to inform equality analysis by this protected group	
Looked After Children	No data is available here to inform equality analysis by this group	
Carers	No data is available here to inform equality analysis by this protected group	

Protected characteristic	Commentary / Analysis	Impacts / Mitigating actions
Deprivation (e.g. income, educational attainment, worklessness)	<p>Scenario 1 This scenario will have a greater impact on those who are also subject to other impacts of welfare reform, including the benefit cap (£3.85)</p> <p>Scenario 2 This scenario is better for those people already subject to the Benefit Cap (£1.93)</p> <p>However, this scenario would disproportionately impact much more on working claimants (£4.44) than claimants not in work (£1.83). In addition, there would be a disproportionate impact on working claimants with children under this scenario (£4.53)</p> <p>Scenario 3 There will be a higher impact of this scenario in the area of St. Michael’s and Foleshill due to the fact that there a higher number of claimants concentrated in these wards.</p> <p>Also, 94% of those out of work have never previously paid any contribution towards Council Tax</p>	<p>Positive impacts: Scenario 2 is better for those on the benefit cap</p> <p>Negative impacts: Scenario 1 will impact on on those already subject to other impacts of welfare reform Scenario 3 will have more impact on those people already living in the most deprived wards of the city. Also, scenarios 1 and 2 will have a more disproportionate impact on working claimants generally and working claimants with children than scenario 3.</p> <p>Mitigations: Set out the mitigation for negative impacts.</p>

3. Have you considered social value requirements as part of this project/review?

Not applicable

Impact on the workforce

4. How many staff belong to the protected characteristics?

Contact the HR Change Management Team (Marion O’Brien, Marion.O'Brien@coventry.gov.uk 024 7683 2454) for management information on the workforce affected by this project/review.

Not applicable

5. What are the likely impacts of this project / review on different groups of staff?

Not applicable

6. Do you plan to undertake formal consultation as part of this project?

Yes No

If no, why not?

7. Has a report to elected members been prepared in relation to this work?

Yes No

Web link to the report: Insert link to the report (usually <http://modern.gov.coventry.gov.uk/>....).

Next steps

Please send this completed pre-consultation form to the Chief Executive's Policy Team: Jaspal Mann (Jaspal.Mann@coventry.gov.uk 024 7683 3112); or Wendy Ohandjanian (Wendy.Ohandjanian@coventry.gov.uk 024 7683 2939). This form will also be shared with Public Health, who will be in touch in relation to the impact of this project/review on health inequalities.

1b

Post-consultation

The section below should be completed following consultation.

Name What is your name?

Date section 1b completed Choose a date.

8. Update any equality impacts on service users listed in Part 1a question 2 following consultation.

Reflect any new information that may have come to light during the consultation process. Under mitigating actions, identify the responsible Council officer or named person in an external provider responsible for completing the action and timescales involved.

9. What were the key findings from the consultation process?

10. Have any of the preferred delivery options or service model(s) changed following the consultation?

Yes No

If yes outline what changes are to be incorporated

11. Update the workforce data tables in Part 1a question 4 as required.

If no changes have been made, state 'no changes made'.

13. Following consultation, please indicate which of the following best describes the equality impact of this review/project.

There will be **no** equality impact if the proposed option is implemented

There will be **positive** equality impact if the proposed option is implemented

There will be **negative** equality impact if the proposed option is implemented but this can be objectively justified

14. Will this form be used to compile a Programme Level Analysis (Part 2)?

Yes No

If yes, state the name of the programme:

Enter the name of the programme.

15. Approvals from Director and Cabinet Member

Name

Date

Director: Name of Director.

Click here to enter date agreed.

Cabinet Member: Name of Cabinet Member.

Click here to enter date agreed.

16. Please detail below any committees, boards or panels that have considered this analysis.

Council Tax Support Equality Analysis

Scenario 1 – The impact of a **20%** reduction in Council Tax Support would result in from the reduction in Council Tax Support. However, other claimants will have a disproportionate impact, especially those working, couples, those with children (larger households), those benefit capped and generally all non-disabled households.

Scenario 2 – The impact of a **10%** reduction and an increase in the taper to 40% in Council Tax Support would result in a reduced impact on those who are out-of-work. However, it would have a greater impact on working households, couples, those with children and non-disabled households claiming Council Tax Benefit Support.

Scenario 3 - The impact of a **15%** reduction in Council Tax Support would result in a relatively **even impact** across all equality groups, with only a slightly higher reduction for couples and large families (most probably due to them living in larger houses/higher CT band).

Note: the following analysis has used the latest Housing Benefit and Council Tax Benefit download (19th June 2015) and mapped this to the previously modelled data. Due to movement on and off this database 4,992 claimants who are currently claiming HB/CTB were not included in the modelled data, also those previously claiming at the time of modelling and not currently on the database will be excluded. 12,431 elderly claimants are also excluded as they are protected.

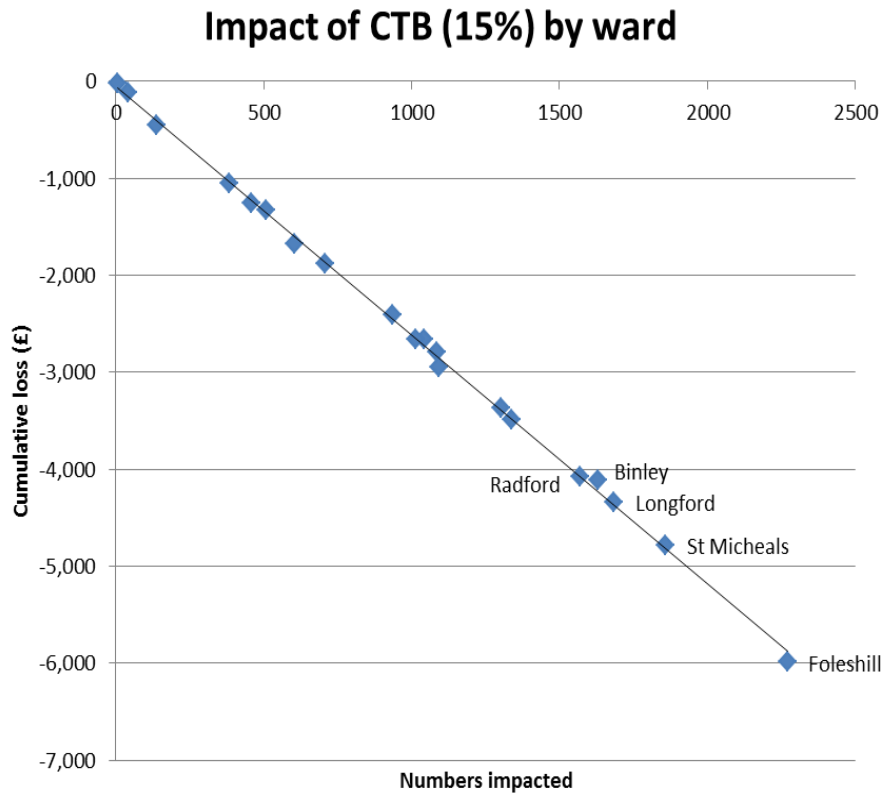

The following table highlights the current proportion of claimants who do not pay any Council Tax, i.e. all of their Council Tax payments at present are covered by Council Tax Benefit Support. This ranges from only 37% of households claiming Council Tax Support who are in work to 98% of those households who are already impacted by the Benefit Cap.

Weekly reduction			Scenario 1 Disabled protected 20% reduction		Scenario 2 10% reduction and 40% levy		Scenario 3 15% reduction		
	Numbers impacted	Proportion who pay no CT	Average loss per HH	Total impact on groups	Average loss per HH	Total impact on groups	Average loss per HH	Total impact on groups

TOTAL		19,667	78%	-£2.59	-£50,951	-£2.55	-£50,158	-£2.61	-£51,421

Ward analysis

Additional analysis on the impact by ward shows equal household impact across all wards, but the cumulative impact is highest across the following areas, due to these areas of deprivation having more claimants of Council Tax Support households; Foleshill, St Michaels, Longford, Binley and Radford.

Scenario 3 – 15% Council Tax Support reduction is illustrated below highlighting the cumulative effect in these areas of deprivation.

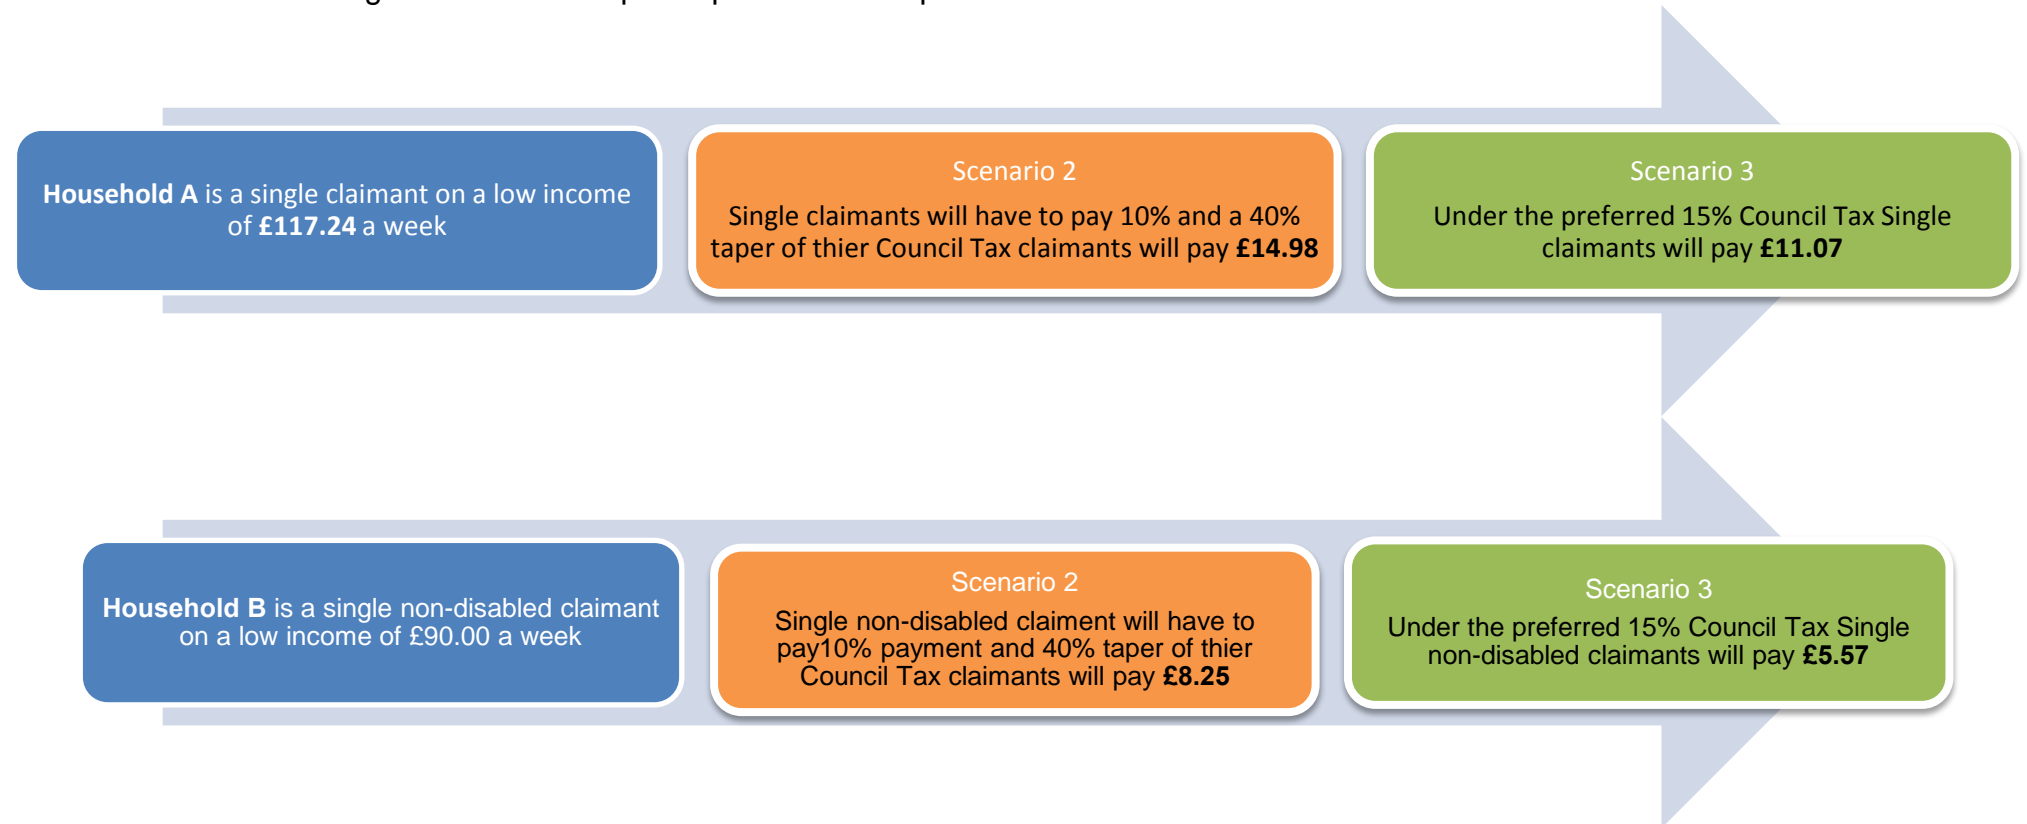

Case studies

Scenario 1 compared with Scenario 3 - protecting disabled households and implementing a higher reduction of 20% across all other households is not preferred due to its severity of impact on other groups and inequality in income levels against Council Tax payments. For working age people who are claiming benefit from the Department for Works and Pensions, disabled people are entitled to the same basic level of DWP benefit as non-disabled people. However, people with disabilities receive extra benefit based on the level and nature of their disability and this extra benefit is awarded to help them with their day to day support needs. Therefore, in Scenario 3 the impact will be the same as it would for a non-disabled person, as the extra benefit they receive for their disability will not be affected. The following case studies illustrate this inequality in income and ability to cope with an additional Council Tax Payment

Scenario 2 compared with Scenario

The 15% reduced is preferred over a 10% reduction and 40% taper because it is believe the impact of this would be too great on working households. The following case studies help to represent this impact.

Version - 20/07/15
