Appendix Section 4: Further information on Equalities

Gender breakdown by Apprenticeship level:

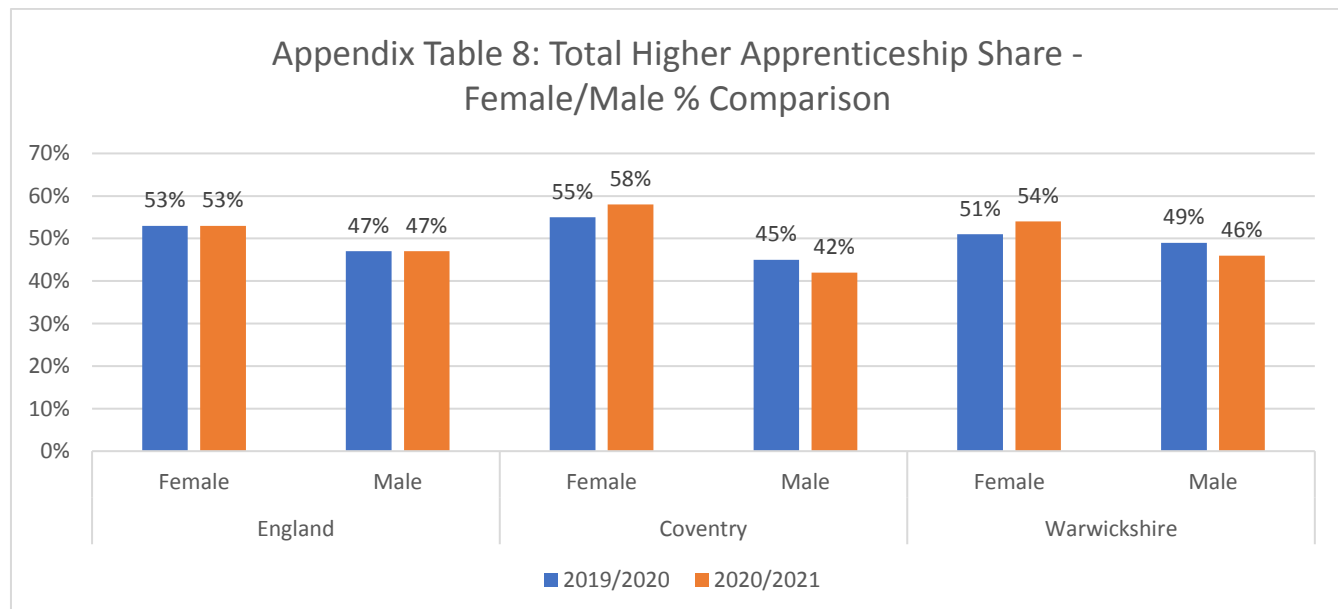

Intermediate Level: For Intermediate Level Apprenticeships Coventry has seen the **highest falls for male apprentices with more females then males completing Apprenticeships in Coventry in academic year 2019/20**, a reverse from 2018/19. This in an inverse of the National trend although Warwickshire has followed a similar pattern. This may in part be to do with the impact of the Pandemic on the manufacturing sector, particularly automotive with large automotive manufacturers (and major employers of Apprentices) such as JLR having to make redundancies. Appendix **Table 6** shows this trend:

Advanced Level: For Advanced Level Apprenticeship delivery the National trend of a shift to a higher proportion of female learners is not replicated in Coventry as shown by **Appendix Table 7:**

Higher Level: For Higher Level Apprenticeships Coventry has seen more of a growth in female learners, which again differs from the National trend as shown by **Appendix Table 8:**
